Bechtel
Anadarko

What does a great safety presentation look like?

As a decision maker for your company are you hoping to find just the right safety program for your group? If you want a customized program that is focused on your outcomes you are in the right place.

As participants listen to Chris Loomis' safety presentation...

They will feel the heat, hear the explosions, smell the fumes of burning chemicals, and see fragments hurdling past them as they run for their lives.

With over 20 years of plant-safety experience, Chris Loomis is a true safety professional. He has seen first-hand, safety challenges faced by plant personnel while working with over 600 chemical, petrochemical, and food-processing facilities as the marketing manager for DuPont's environmental and safety services.

Your attendees will share a renewed respect for safety procedures and gain an understanding of the importance of practicing Safety First in the workplace, at home and on the road.

**For a lasting impact on safety attitude,
your next presentation needs Chris Loomis.**

"I have worked with many top
safety speakers and have found
no one better than Chris Loomis."

Regional Manager
Shell Lubricants

**Safety
is an
Attitude**

Safety is an Attitude • Safety Leadership for Supervisors

Chris's Programs have the Best Retention Rate

Safety Attitude uses 6 separate learning principles in his presentation. What this means to your group is a fantastic retention of the safety material presented and a reduction of accidents at home and on the road. Over 95% of our surveys show that eight weeks after a professional safety speakers presentation, the group has retained less than 5% of the speaker's main points. With Chris's interactive, customized and very high wow factor safety presentation, the retention rate after eight weeks exceeds 84%.

Chris's safety presentations give you an incredible value and a great return on your investment. Through his safety presentations, your workers will learn how to develop a **24/7 safety attitude**. This means less accidents at work, home, and on the road.

I. When safety is an attitude, nobody gets hurt!

The focus of this very powerful and interactive 45 to 90 minute presentation is for the participants to start to develop a **24/7 safety attitude**. This is a paradigm shift from other safety presentations; it addresses the 4 behaviors that are involved in 86% of all workplace accidents. Through group participation, we look at the behaviors that were responsible for the accidents being reviewed and how a change in behavior can prevent accidents from happening.

II. Start Strong! Finish Strong!

This presentation is specifically designed for groups starting or completing a large engineering project.

This program is 45 to 90 minutes and focuses on safety in your work environment using two unique and powerful learning tools. It addresses the 4 behaviors that are involved in 86% of all workplace accidents.

Programs are customized to your workplace and review accidents that have happened or could happen in your workplace.

III. Ergonomics in your work environment, on the road, in a plane and at home

This is a 45 to 60 minute program customized to your workplace that focuses on ergonomic safety in your work environment, on the road, in a plane and at home. This safety program addresses the 4 behaviors that are involved in 86% of all ergonomic injuries.

IV. Safety at home and on the road

This is a 45 to 60 minute program and focuses on safety at home and on the road. Over 94% of the accidents that an employee experiences in their working career happen at home or on the road. Sometimes the most dangerous job an employee has all day is driving to and from work. We address the 4 behaviors that are involved in 86% of all home and driving accidents.

V. Safety Communication for Managers and Supervisors

The focus of this powerful and interactive 45 to 90 minute presentation is for managers and supervisors to learn techniques in safety communication that will prevent future accidents. These techniques were learned over 20 years of dealing with a variety of safety challenges at a multitude of plants.
